

TYLIX

Tylix is an ERC-20 standard token that aims to become one of the largest payment systems in the gaming world

-
- Some of the issues Tylix addresses in gaming payment systems:
 - -Technical Issues
 - -Security Issues
 - -Financial Transactions Issues
 - -Payment Methods Problems
 - -Customer Service issues
 - -Regional/Global Constraints

Tylix has a total supply of 1,000,000 and continues to grow every day.

TYLIX

Tylix will initially be used for in-game payments but will later expand to NFTs and decentralized governance. It utilizes a Proof-of-History (PoH) based blockchain architecture, which verifies the sequence and timing of events.
